

INSURANCE PROVIDERS SUSTAINABILITY RANKINGS

At Sustain, we believe that the availability of information is one of the most important aspects to corporate sustainability. That's why our sister company, Sustain Reporting Services, has created a proprietary scoring matrix which rates all of our insurer partners by their sustainability credentials. Only publicly available information has been used for this process and this will be updated as insurers become more transparent on the efforts they are making around sustainability.

Please note, as this is a quantity based ranking, a lower tiered provider may have a data point that higher tiers do not, but its' scope is limited.
